PINE FLUID

DISINFECTANT BASED ON QUATERNARY AMMONIUM COMPOUNDS

Pine Fluid is a pleasantly perfumed yellow disinfectant based on quaternary ammonium compounds. It has a broad spectrum action against gram negative and gram positive organisms. It has low toxicity and skin irritation and is used as a deodorizer and disinfectant in hospitals, veterinary clinics, compounds, public buildings and factories on all hard surfaces.

DISINFECTING EFFICACY

When tested in accordance with paragraph 3,1 of SABS 636 a 99,9% kill of the following organisms is achieved in 10 minutes at the indicated dilutions.

- Staphylococcus aureus : 1:500
- Escherichia : 1:100
- Pseudomonas aeruginosa : 1:75

USE DIRECTIONS

General disinfection of walls, floors and toilets:

Use at a dilution of 1:100 minimum exposure time for 10 minutes

Heavy duty disinfection of hospitals and veterinary clinics:

Use at a dilution of 1:50 for minimum exposure time of 10 minutes

SAFETY PRECAUTIONS

DO NOT use in conjunction with soap or other detergents. Surfaces should be pre cleaned and well rinsed with clean water before treatment. Contamination of foodstuffs should be avoided. Painted surfaces, asphalt, rubber and plastic coverings must be thoroughly rinsed with water within 15 minutes of treatment.

TECHNICAL DATA

- Appearance : slightly hazy amber liquid with solvents, mild alkali, wetting agents, emulsifiers and penetrants.
- S G : 1,03 approx.
- Ph 20% sol.: 11,2
- Stability : stable to continued freeze/thaw cycles.

NOTE

Because WB Amber contains free fatty alkalinity, care should be taken on painted surfaces. Aluminium surfaces may become dull after continued cleaning with WB Amber.

SAFETY PRECAUTIONS

WB Amber contains alkaline material. Avoid contact with eyes and prolonged contact with skin. In the case of accidental contact, rinse freely with water and obtain medical attention.
