## AUTO DISH "P"

Auto Dish "P" is a high caustic, chlorinated detergent powder for use in industrial and domestic dishwashing machines in which the machine parts coming into contact with the wash solution are of stainless steel construction.

Auto Dish "P" is essentially non-foaming and is excellent for the removal of protein, gravy and egg stains. The modern formulation contains the essential phosphates so that it has the ability to soften water and to provide excellent emulsification and dispersing of the food soils, as well as helping to hold the soils in suspension so that they can be rinsed freely from the dish surfaces.

Auto Dish "P" contains organic chlorine to promote free rinsing and help eliminate water spotting. In addition this chlorine ingredient helps break down protein type soils which are then more easily removed by the detergent which in turn leaves the dishes and glassware spot free. The chlorine will also contribute to the sanitising.

### USE DIRECTIONS

The guideline for the dosage rate into the dishwashing machine is 100 – 200 grams per 50 liters of water.

### SAFETY PRECAUTIONS

Contains caustic alkalis. Avoid skin contact, in case of accidental contact rinse well with large amounts of water. In case of eye contact, rinse well with water and seek medical attention.
