## CARE

### SOLVENT DEGREASER

Care is a low aromatic solvent degreaser specifically designed and formulated for degreasing machine parts which are destined for use in electrical systems. Care has also found use as a degreaser for ferrous and non-ferrous metals, specifically the type which have been accurately machined. A further application is the degreasing of hydraulic pumps and their respective components.

### PROPERTIES

- Appearance : Clear, light yellow liquid with a characteristic paraffin odour.
- pH (10%) : N/A.
- S.G : 0,8.
- Stability : Stable to continued freeze / thaw cycles.

### FEATURES

Care has been specifically formulated with a number of features and benefits in mind, and these are:

1. In many cases the degreasing of finely machined parts involves handling these parts by hand. Often the use of gloves as protective equipment can cause a handling problem in the degreasing solvent and consequently bare hands may be used to ease the situation. Continued handling in degreasing solvents results in defatting of the skin causing cracks and the consequent start of infections.
2. Care has been specifically formulated to overcome these problems by incorporating small amounts of lanolin which imparts a soft feel to the skin and replaces the essential oils that have been removed by the degreasing process.
3. Care contains low aromatics,. Aromatics are one of the causes of irritation to hands and the resultant cause of dermatitis. By controlling the amount of Aromatics in the solvents, the occurrence of dermatitis can be minimized.
4. Care contains a disinfectant. The object of the disinfectant is not to stop infections, but however, in the case where there are open sores on the hands in the use of a degreasing solvent, the chance of infection is minimized.
5. It imparts a very light residual oil "finish" thereby preventing further rusting of the highly machined parts and electrical equipment.

## USE DIRECTIONS

Care is designed to be used as is. The parts are degreased in Care, removed and allowed to drain and for solvent evaporation to occur. The lanolin derivatives in Care permit the use of the solvent degreaser without protection equipment, although, where possible, it is recommended that protective clothing be worn.

## SAFETY PRECAUTIONS AND FIRST AID

**WARNING:** Care is flammable!! Avoid storing near hot surfaces and use near open flames.

- EYES : In the case of accidental eye contact, rinse freely with water and obtain medical attention.
- SKIN : Wash off with water. Seek medical attention.
- INGESTION : Give milk to drink. Seek medical attention.
- INHALATION : Move to fresh air.
- NOTE : DO NOT MIX WITH ANY CHEMICALS.
- REF : CARE001
- DATE : 4 MARCH 2012
