BLUTEX

ALKALINE LAUNDRY DETERGENT POWDER

Blutex is a mildly alkaline laundry detergent powder containing a very high percentage of nonionic synthetic detergent materials. Its high activity is made up of a blend of oil solubilising ethoxylated agents making it eminently suitable for all classes of both natural and synthetic fibres. It is particularly useful for laundering personal wear, woollens, blankets, washable carpets and coloured garments. Being mildly alkaline, Blutex can be used by hand, although continued daily contact may cause irritation and should be avoided. It is suitable for both hard and soft water areas and is completely free rinsing.

PROPERTIES

- Appearance : White powder.
- pH (10%) : N/A.
- S.G : N/A.
- Stability : Stable to continued freeze / thaw cycles.

FEATURES

1. High foaming
2. Highly phosphated
3. Mildly alkaline
4. Freely soluble

USE DIRECTIONS

LIGHT TO NORMAL WASHING : Blutex is added dry to the wheel at the rate of 400 – 500 grams per 100 kg dry weight of laundry. Temperatures should be 60°C for coloured work and 80 - 90°C for white work.

HEAVILY SOILED LINEN : Under these conditions additional alkalinity is required and a two wash process is recommended. A typical wash formula for heavily soiled work is as follows (for 100 kg dry-weight).

SAFETY PRECAUTIONS AND FIRST AID

EYES : In the case of accidental eye contact, rinse freely with water and obtain medical attention.
SKIN : Wash off with water.
INGESTION : Give milk to drink. Seek medical attention.
INHALATION : No risk.
NOTE : DO NOT MIX WITH ANY CHEMICALS.
REF : BLUTEX001
