## CONTACT

### BALANCED LAUNDRY ALKALI BUILDER

Heavy duty liquid laundry detergents have been used for many years but have only gained impetus recently over the last few years. Their grow was spurred largely in the United States because of phosphate legislation taking full advantage of the problems associated with powders containing phosphates. But today, liquid laundry detergents have a definite place in the market. Professional launderers are coming to realize that products like Contact can produce excellent laundry results comparable with the conventional powders. The greatest advantage of a product like Contact is that it can be dispensed automatically via specialized dosing equipment. This results in an obvious cost saving, e.g. elimination of unnecessary wastage of detergent and is also labour saving. Contact contains a high percentage of wetting agents and is therefore particularly suited to the washing at lower temperatures of the polyester/cotton type garments. It can be used without alkali depending on the degree of soiling.

## PROPERTIES

- **Appearance** : Light blue liquid with a characteristic fluorescence.
- **pH (10%)** : N/A.
- **S.G** : N/A.
- **Stability** : Stable to continued freeze / thaw cycles.

## FEATURES

1. Economical concentrated formula
2. Free rinsing
3. High foaming

## USE DIRECTIONS

The following dosage are for typical soiled table / kitchen linen load of 50 kg dry weight.

- Use 400 – 800 mls, 2 washes, 3 rinses

## SAFETY PRECAUTIONS AND FIRST AID

**EYES** : In the case of accidental eye contact, rinse freely with water and obtain medical attention.  
**SKIN** : Wash off with water.  
**INGESTION** : Give milk to drink. Seek medical attention.  
**INHALATION** : Move to fresh air.  
**NOTE** : DO NOT MIX WITH ANY CHEMICALS.
