LAUNDRY DEGREASER

OIL STAIN REMOVER

Laundry Degreaser is used as a booster in the laundry process for the removal of heavy grease and oil stains from overalls, dust coats, kitchen-wear and table linen. It consists of a system of nonionic emulsifiers blended into highly active hydrocarbon solvents, especially balanced to give penetration and removal by emulsification of oil based soils.

PROPERTIES

- Appearance : Pale yellow liquid.
- pH (10%) : N/A.
- S.G : N/A.
- Stability : Stable to continued freeze / thaw cycles.

FEATURES

1. Rapidly emulsifies oil and grease stains
2. Forms a stable emulsion when mixed with water
3. Very mild odour
4. Free rinsing

USE DIRECTIONS

- For single wash processes use at 300 – 600 mils per 45 kg (100 lbs) at a temperature of 80°C for 10 min cycles.
- Two wash operations, Laundry Degreaser must be added to the first wash. Temperatures and concentrations are the same as for single wash.
- For crock bath and soak treatment, mix 1 litre Laundry Degreaser and 1 kg alkali into 120 – 150 litres water. If possible, heat to approximately 60°C. Allow garments to soak for 30 – 60 min. After soaking proceed with the wash in the normal manner.

SAFETY PRECAUTIONS AND FIRST AID

- EYES : In the case of accidental eye contact, rinse freely with water and obtain medical attention.
SKIN : Wash off with water.
INGESTION : Give milk to drink. Contains hydrocarbon solvents. Seek medical attention.
INHALATION : Move to fresh air.
NOTE : DO NOT MIX WITH ANY CHEMICALS.
